

Speaker	Lecture Title
Peter Calabresi	Endogenous Remyelination and Neuroprotection in Multiple Sclerosis
Chris Smyser	Predicting Childhood Outcomes in Preterm Infants Using Cerebral Connectivity
John Morris	Racial Disparities in Alzheimer Disease
Ed Hogan	The Role of the Insula in Epileptic Seizures
Igar Korainik	From Orphan to Global: the Yin and Yang of JC Virus in the Nervous System
Beau Ances	Mileposts in Memory Loss: The Role of Biomarkers in Alzheimer's Disease (AD)
Glenn Lopate	Is small fiber neuropathy a disease of muscle?
Roy Hamilton	Stimulating Conversations: Noninvasive Neuromodulation of Language Networks to Characterize and Treat Aphasia
Mustafa Sahin	Mechanism-based biomarker and treatment trials in Tuberous Sclerosis
Salim Chahin	Predict, Protect and Repair: New Concepts in Multiple Sclerosis Management
Trent Moeller	Reducing Neck and Back Pain by Changing the Way That We Work, Play and Rest
Jay Maiti	
Manu Goyal	Last known normal: The evolution of acute stroke imaging beyond the 'normal' head CT
Andrew McKeon	Intermediate Filament Autoimmunity: GFAP and Neuronal
Dr. Anita Battaharya	Advancing Understanding of Developmental Disorders Using human iPSCs
Greg Zipfel	New Therapeutic Approaches to Subarachnoid Hemorrhage-Induced Brain Injury
David Greer	Neuroprognostication After Cardiac Arrest
Joy Snider	66 yo M with subacute progressive sensory changes
Eric McDade	Cerebrospinal Fluid Tau Species Identify Stages of Disease in Dominantly Inherited AD
David Hafler	Approaching the Cause of Multiple Sclerosis
Meaghan Campbell	Resting-State Functional Connectivity Biomarkers for Parkinson Disease Dementia
Devin Brown	Sleep SMART
Kathrin LaFaver	Functional Movement Disorders: From Understanding Pathophysiology to Recovery
Andy Josephson	The Rise of Neurohospitalists and the Future of Inpatient Neurology
Deb Friedman	Spontaneous Intracranial Hypotension
Neda Ladbon-Bernasconi	Network Level Analysis of Structure and Function in Temporal Lobe Epilepsy
Stephanie Morris	A 9 Year Old Girl Presenting with 4 Weeks of Headaches, Irritability, and Blurry Vision.
Rebecca N. Ichord	Childhood Arterial Ischemic Stroke: Progress and Prospects 2019
Gus Davis	APOE Genotype Regulates Pathology and Disease Progression in Synucleinopathy
Milan Chheda	Zika virus as a new therapy for glioblastoma
Heather Fullerton	"Childhood Cerebral Arteriopathies: A Changing Landscape"
Scott Norris	"A 41-year-old man presents with several years of right facial twitching and a 50 pound weight loss over the prior year."
Teddy (Tzu-Ching) Wu	Telemedicine: Transforming the Delivery of Stroke Care
Patricia Dickson	Cerebrospinal fluid delivery of recombinant enzymes for lysosomal disease
Chris Wehl & Drew Findlay	"Limb girdle muscular dystrophy: bedside to bench and back to bedside."
